

Nicholas C. Brown

Full-stack Developer

Full-stack software developer with an eye for visual design and a desire to build innovative user experiences. Experienced working on agile project teams.

EXPERIENCE

Senior Developer • TD International LLC, Washington, DC (*Remote*)
November 2019 – Present

- Served temporarily as the technology platform lead.
- Participated in all stages of SDLC, including requirements gathering, story grooming, devops, and support.
- Built demos for potential clients & responded to RFPs.
- Designed and developed an audit trail integration between Salesforce and Heroku.
- Trained developers on software engineering practices and analysts on Salesforce best practices. Wrote the company's developer style guide and engineering best practices guide.

Senior Technical Consultant • Acumen Solutions, Seven Hills, OH
January 2016 – November 2019

- Began as an entry-level consultant and advanced to the senior level, becoming a people manager & managing five developers.
- Developed and deployed web applications and supported Salesforce organizations and public-facing Communities for more than eight clients.
- Launched two GIS microservices built with Python and served via AWS Lambda that conducted point-in-polygon algorithms with latitude and longitude coordinates, eliminating hundreds of time-consuming manual tasks.
- Extended and maintained a .NET-Salesforce integration.
- Upgraded and maintained multiple ETL processes hosted on AWS EC2.
- Front-end stack specialist and UI/UX designer. Built wireframes and interactive prototypes using Justinmind.
- Presented multiple tech talks on subjects such as internationalization in Salesforce, user experience design, accessibility in software, and building web services on AWS.
- Conducted bi-weekly code reviews.
- Interviewed candidates for technical positions.
- Internal Wiki administrator, serving the entire company.

Engineering Operations Co-Op • Diebold Inc., North Canton, OH
June 2014 – December 2015

- Developed a SharePoint site with a tech support portal providing documents & communication tools for an international engineering audience, available on mobile and desktop.
